Meeting Date: 2/20/2018
Attendees: Kevin, Jorge, Zach, Bekah

Keep it simple!

Divide out project tasks:
- **Front end (HTML, JavaScript)**
- **Back end (PHP -- scripting language used inside HTML)**
- **Build database using MySQL (define keys and attributes, normalize, relations)**

Name	Job for this week
Bekah	Start making EXCEL sheet of Database #2: product name, description, image url, price. This will be eventually put into Jorge's MySQL database.
Jorge	Prototype MySQL/PHP with database (Database #2: product name, description, image url, price)
Zach	JavaScript and HTML - start setting up basic UI
Kevin	JavaScript and HTML - start setting up basic UI
Theo	Prototype MySQL/PHP with database (Database #1: username, password, highscore)
BP	Prototype MySQL/PHP with database (Database #1: username, password, highscore)
